

DHANUSH MOVVA

Houston, Texas(Open TO Relocate) | +1(703) 649-9167 | dhanushmovva@gmail.com | <https://www.linkedin.com/in/dhanush-movva-bb3746122/>

Profile Summary

Experienced Business Intelligence Analyst with 6+ years of delivering **enterprise-grade analytics solutions**, dashboards, and **scalable data models** across cross-functional teams. Specializing in **Microsoft Fabric, Power BI, Snowflake, and Azure**, with a strong track record of improving **reporting accuracy, operational efficiency**, and enabling **data-driven decision-making**. Proficient across the **full BI lifecycle**, including requirements gathering, **data modeling, ETL/ELT development, security implementation**, and production support. Hands-on experience with **Power Platform tools (Power Apps, Power Automate, Dataverse)** to extend analytics into **business process automation**. Adept in **Git-based version control and CI/CD pipelines**, ensuring **reliable deployments, high code quality**, and **scalable, enterprise-ready BI solutions**.

- **Microsoft Certified: PL-300 (Power BI Data Analyst)** and **DP-600 (Fabric Analytics Engineer Associate)** with strong expertise in enterprise BI and analytics solutions
- Extensive experience designing and implementing **end-to-end Microsoft Fabric architectures** including **Lakehouse, Warehouse, Dataflow Gen2, and Pipelines** for scalable data solutions
- Advanced proficiency in **Power BI, DAX, and data modeling**, building high-performance semantic models, optimized measures, and enterprise-grade reporting solutions
- Strong hands-on expertise in **Snowflake, SQL (T-SQL), and ETL/ELT processes**, enabling efficient data integration, transformation, and analytics
- Proven ability to design and implement **secure, scalable data models**, including **Row-Level Security (RLS)** and governance frameworks for enterprise reporting
- Experience in integrating **Power Platform solutions (Power Apps, Power Automate, Dataverse)** to drive **data-driven process automation and business workflows**
- Hands-on experience leveraging **AI and Generative AI tools**, including **Copilot Studio, Snowflake Cortex, and Claude**, to build **intelligent analytics and automation solutions**
- Expertise in developing **AI-powered and data-driven agents** to enhance business insights, decision-making, and operational efficiency
- Strong understanding of **SDLC, Agile/Scrum methodologies**, and enterprise BI delivery, ensuring **high-quality, performance and production-ready analytics solutions**

SKILLS

Data Analysis and Visualization: Power BI, DAX, Azure, Data Modeling, Data Analysis, Dashboard Design.

Database and Querying: SQL Server, Snowflake, Dataverse, SQL (T-SQL), Data Warehousing, Data Pipelines.

Microsoft Fabric: Lakehouse, Warehouse, Dataflow Gen2, Pipelines, One Lake, Delta Lake.

Programming Language: SQL, Python, DAX, R.

AI and Advanced Analytics: Generative AI (Copilot Studio, Snowflake Cortex, Claude Code), Predictive Analytics.

Tools and Platforms: Azure Functions, Power Apps, Power Automate, Dataverse, Git, Agile, JIRA, ServiceNow, MCP Servers.

Professional Experience

WM, Houston Texas, Senior Power Platform Developer

August 2024–Present

- ◆ **Designed and delivered enterprise-level Power BI dashboards** for driver performance across **7+ business units**, improving **data accuracy by 75%** and **workflow efficiency by 30%**
- ◆ Re-architected existing Power Apps application, improving performance by **90%** and delivering **\$500K+** in operational cost savings.
- ◆ Built **operational and executive dashboards** for route managers, driving **35% improvement in on-time deliveries** and enhanced driver performance tracking
- ◆ Developed **advanced DAX measures, KPIs, and semantic models**, improving accuracy and analytical capabilities by **15%+**
- ◆ Implemented **end-to-end Microsoft Fabric solutions** including **Lakehouse, Data Pipelines, and Direct Lake models**, improving report performance by **65%**
- ◆ Engineered **data pipelines integrating Snowflake, SQL Server, SharePoint, APIs, and Fabric**, handling **5M+ records** for scalable analytics
- ◆ Built **Power Apps and automated workflows (Power Automate)** for **10+ business processes**, including **UKG/Kronos timecard exception management**, improving productivity by **65%**
- ◆ Developed **AI-driven analytics solutions and agents** using **Copilot Studio, Snowflake Cortex, and Claude**, delivering actionable insights to business users
- ◆ Implemented **enterprise security and governance** using **Row-Level Security (RLS) and Azure AD**, ensuring secure access for **4000+ users** and maintaining **99.9% uptime**

City of Garland, Texas, Senior BI Analyst

March 2024 – August 2024

- ◆ Collaborated with city stakeholders to design and deliver **Power BI dashboards and Power Platform solutions**, improving **data-driven decision-making by 55%** and contributing to **\$2M+ in revenue impact** through optimized reporting and analytics.
- ◆ **Built** data flows integrating APIs, SQL Server, SharePoint **enabling reliable** weekly and monthly reporting
- ◆ **Engineered** Azure Data factory pipelines **for systems including** Samsara, CIS, E-Assist, Avaya and Service Link, **centralizing data for analytics**
- ◆ **Developed** waste analytics dashboards, **improving** data accuracy by **90% for landfill and trash tonnage tracking**
- ◆ **Designed reporting solutions** for missed service requests, **reducing** issue resolution time by 20%
- ◆ **Analyzed** landfill operations and revenue metrics (Compu-Weight), **improving** resource utilization efficiency by **75%**
- ◆ **Created** optimized data models and DAX calculations (**time intelligence, aggregations**), **improving** data processing performance by **40%**
- ◆ **Delivered** Power Apps and Power Automate solutions, **increasing productivity by 65% and saving** 20+ hours per week

Neutek Consulting, Frisco, Texas, *BI Analyst*

Jan 2023 – August 2023

- ◆ Designed and implemented Power BI dashboards and advanced visualizations, **increasing user engagement and analytics adoption by 40%**
- ◆ **Partnered with** business stakeholders and development teams **to deliver BI solutions**, **reducing** project timelines by 30%
- ◆ **Streamlined** ETL processes (data extraction, transformation, loading), **reducing** report generation time by 58%
- ◆ **Analyzed and validated multiple data sources**, **ensuring alignment with business processes and improving** data accuracy by 68%
- ◆ **Implemented** Row-Level Security (RLS) **and role-based access controls**, **achieving** 100% compliance in data access governance
- ◆ **Built and integrated** Power Apps (Canvas & Model-Driven) **solutions with** Dataverse, SharePoint, SQL Server, and APIs **for enterprise applications**
- ◆ **Developed** custom connectors and automated workflows using Power Automate, **improving operational efficiency and system integration**
- ◆ **Provided** ongoing support and performance optimization **for Power BI, Power Apps, and SharePoint solutions**, **ensuring stable and reliable business operations**

BNP PARIBAS, CHENNAI INDIA, *Power BI Developer*

June 2019 – Dec 2021

- ◆ Translated complex business requirements into **scalable Power BI data models and reporting solutions**, optimizing development workflows and reducing delivery timelines by **80%**
- ◆ Integrated **multiple data sources (Oracle, Azure, SQL Server, SharePoint, OneDrive)** using Power Query, enabling **centralized and scalable reporting**
- ◆ Performed **data extraction, transformation, and cleansing**, improving **data accuracy by 75%** across reporting systems
- ◆ Designed and implemented **dimensional data models** (star and snowflake schemas), enhancing performance and scalability
- ◆ Developed **interactive Power BI dashboards and reports**, including CyberArk analytics, reducing **manual effort by 95%** and improving accuracy by **90%**
- ◆ Optimized **Power BI performance through query tuning and data model optimization**, improving efficiency by **60%**
- ◆ Built **advanced DAX calculations and applied time intelligence functions**, enabling deeper insights and improved business reporting capabilities
- ◆ Implemented **enterprise data security and governance**, including **Row-Level Security (RLS), Power BI Gateway configuration, and access controls**, ensuring secure and compliant data access

CERTIFICATIONS & ACTIVITIES

- ◆ **DP-600: Microsoft Certified: Fabric Analytics Engineer Associate – Credential ID: 85B1EF0581712DB3** [Link](#)
 - ◆ **PL-300: Microsoft Power BI Data Analyst – Credential ID: 85B1EF0581712DB3** [Link](#)
 - ◆ **GRADUATE CERTIFICATE IN BUSINESS ANALYTICS - University of Texas at Arlington**
 - ◆ **PwC Switzerland Power BI Virtual Case Experience – PWC**
-

EDUCATION

- ◆ **Master's in information systems** – University of Texas at Arlington | Jan 2022 – Dec 2023
- ◆ **Bachelor of Engineering, Electronics & Communication** – Anna University, Chennai | Aug 2015 – Apr 2019
